

Job Title: Prosthetic and Orthotic Technician

Position: Full-Time

Benefits: Competitive pay based on experience; retirement options, health insurance, paid time off

Schedule: Monday – Friday, 8:30–5:30

Location: 66 Myron Street, West Springfield, MA

About Prosthetic & Orthotic Solutions, LLC

We are a prosthetic and orthotic provider committed to selecting and customizing devices based on the highest degree of comfort and function. Known for our superior in-house fabrication, compassionate care, and team approach, we are expanding both our practice and health care affiliations in the Western Massachusetts and Greater Hartford areas. Positive, motivated individuals will enjoy the benefits of a company poised for growth and loyal to its roots as an understanding, family-oriented practice.

Position Overview

We are looking to add a talented, creative prosthetic and orthotic technician to our team. The ideal candidate will demonstrate attention to detail and bring experience with tools and hands-on work. Collaboration with our practitioners in the evaluation and analysis of patients' needs is essential. Our patients get to know and trust our technicians, just as they do our practitioners. Compassion, sensitivity, and good interpersonal skills are essential when gathering information to design, adjust, or repair their devices. The technician must also be comfortable working independently in our state-of-the-art lab and be able to fabricate artificial limbs and orthotic devices such as, but not limited to, upper and lower extremity prosthetics, AFOs, KAFOs, CROW walkers, and foot orthotics. This involves work with plastic, rubber compounds, vinyl, and contact cement.

Primary Job Responsibilities:

- Use of scanning technology, casting, and foam impressions
- Excellent hand-eye coordination with the ability to place, size, adhere, shape and/or form materials together according to written instructions
- Ability to use competently: floor standing grinding machine and other applicable hand tools and machinery as needed for the fabrication of prosthetic and orthotic devices
- Comply with and operate within company-specified safety standards
- Clean and maintain workstation regularly
- Other duties as assigned

Qualifications:

- High school diploma or equivalent required; certificate or associate's degree as a prosthetic and orthotic technician preferred
- Experience in the field preferred, but not required; must have experience working with hands in a technical setting
- The ability to stand for full shift and walk for intermittent periods of time in a workshop environment
- Lift and control 50lbs, climb a ladder, stoop, squat, and handwrite legibly
- Read, write, and speak English fluently
- Comprehend and convert written instructions (in English) into product specific components and operate within company systems
- Demonstrate general math aptitude

Travel

Position requires willingness to travel between offices and to accompany practitioners on visits to and from patient homes, hospitals, and nursing and rehabilitation facilities.
